\* February 1968 data adjusted to 28 days before computing percentage change.

Minimum Prices. The weighted average Class I price paid by handlers regulated in 58 comparable Federal milk order markets for 3.5 percent milk in December 1969 was \$6.89 per hundredweight, 29 cents higher than the \$6.60 per hundredweight price in December 1968. (See table 2.) Class I prices announced for January 1970 with comparisons with January 1969 are shown on table 1.

Producers in the 58 markets received a weighted average blend price of \$6.18 per hundredweight for 3.5 percent milk in December 1969, 23 cents higher than the \$5.95 price received by producers in December 1968. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 2.

Producer Deliveries. A total of 100,417 producers delivered 3.6 billion pounds of milk to handlers in the 58 markets during December 1969. This is 3.3 percent above producer deliveries in December 1968. Average daily delivery per producer increased from 1,090 pounds in December 1968 to 1,154 pounds in December of this year. Producer number, producer deliveries, average butterfat percentages, and average daily delivery per producer for individual markets are shown on table 4.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 58 markets increased 3.5 percent from last year, to a total of 2.5 billion pounds for the month of December 1969. (See table 5.)

Percentage of Producer Deliveries Used in Class I. The average utilization percentage in 58 markets for December 1969 was 69 percent, the same as for December 1968. (See table 5.)

Fluid Milk Product Sales. Total in-area sales for December 1969 in 60 marketing areas are estimated to be about 2.7 billion pounds, 3.8 percent above such sales in December of last year.

Total fluid in-area sales for November 1969 were 3.8 percent below sales for November 1968. This decrease was the result of decreases in sales of whole milk, mixtures, and cream items of 6.3 percent, 11.7 percent, and 7.9 percent, respectively, which were not offset by the 8.5 percent increase in sales of skim and lowfat milk items. Complete November in-area sales for total fluid items, and the four major fluid product grouping (whole milk, skim milk items, mixtures and cream) are reported on table 8.

For the period January through November 1969, total in-area sales of fluid milk items in Federal milk order markets, where comparable data were available, were 0.3 percent above total fluid sales for the same period of 1968. Sales were up for all skim milk items, except plain skim milk. Sales of lowfat (2%) milk, and skim milk with solids added continued to show the largest increases, increasing 18.9 percent and 17.4 percent respectively. Sales of all other fluid milk items, for the January-November 1969 period, were down from the previous year, with the exception of flavored whole milk and sour cream. Whole milk was down 2.2 percent, milk and cream mixtures were down 6.6 percent, and cream items were down 5.7 percent. Daily average sales of individual fluid milk products are shown on table 9.

Filled and Imitation Milk Sales. Survey data of filled and imitation milk sales in Federal order markets, October, November, and December 1969 are presented on table 12.

### **ANNUAL - 1969**

Minimum Prices. The weighted average Class I price for 1969 for the 58 markets was \$6.67, 27 cents higher than the \$6.40 price for 1968. The weighted average blend price for 1969 was \$5.87, 20 cents higher than the blend price of \$5.67 reported for 1968.

/Since January 1969, prices for the Massachusetts-Rhode Island-New Hampshire and the New York-New Jersey markets have been reported at the cities of Boston and New York respectively. Prior to this time, prices for these markets were announced at points 201-210 miles from the respective cities. The 1968 revised all market prices in this issue reflect the city prices in these two markets, which in part, explain the sixcent difference between the 1968 all market Class I price of \$6.17 reported in the December 1968 issue of F.M.O.S. and the \$6.23 price herein reported. The revised all market blend price for 1968 is \$5.53, seven cents higher than the \$5.46 price reported in the December 1968 issue. (See table 3.)

Producer Deliveries. Producer deliveries during 1969 totaled 43.4 billion pounds in 58 markets, 2.7 percent above producer deliveries made during 1968. (See table 6.)

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I during 1969 in 58 markets, totaled 28.3 billion pounds, 1.5 percent above such Class I use during 1968. (See table 6.)

Percentage of Producer Deliveries Used in Class I. The average utilization percentage in 58 markets for 1969 was 65 percent, compared to 66 percent for 1968. (See table 6.)

<sup>1/</sup> Volumes include 29-day totals for February 1968. The percentage changes are based on adjusted 28-day totals for February 1968 to make them comparable to 1969.

<sup>2/</sup> Markets under regulation on January 1, 1968, and which have had no significant marketing area expansions. Excludes Eastern Chio-Western Pennsylvania, Chicago Regional, Indiana, Nebraska-Western Iowa, Minneapolis-St. Paul, Southeastern Minnesota-Northern Iowa, Georgia, North Texas, and South Texas.

<sup>3/</sup> Class I plus Class II = 5,598,298 thousand pounds and utilization = 56% in 1968.

4/ Producer deliveries (21,261 thousand pounds) and producer deliveries used in Class I (16,413 thousand pounds) included in the Chicago pool in December 1968 have been excluded and are included in December 1968 Indiana totals. These quantities are associated with handlers formerly regulated under Chicago which are now regulated under the Indiana order.

#### Amendments:

Central Arizona - December 1 (34 FR 17428, 10/29/69). Producer-handler definition revised to allow a producer-handler to receive fluid milk products from pool plants or other order plants in an amount not to exceed the lesser of five percent of his total fluid disposition for the month, or 5,000 pounds. He may not reprocess or convert milk products into a fluid milk product except to increase the nonfat milk solids content above that of the fluid milk product received.

This amendment provides a new provision defining "filled milk," and also provides for the product "filled milk" to be included in the fluid milk product definition. Filled milk is defined as any combination of nonmilk fat or oil with skim milk (whether fresh, cultured, reconstituted, or modified), so that the product resembles milk or any other fluid milk product, and contains less than six percent nonmilk fat (or oil). Pool plant provisions are revised to exclude filled milk in determing standards necessary to obtain pool plant status.

The <u>allocation provisions</u> would allocate filled milk just as fluid milk products are now handled, except reconstituted filled milk would be down-allocated. Any reconstituted skim milk in filled milk allocated to Class I at a pool plant is subject to a Class I less surplus price charge.

This action provides that <u>diversions</u> of milk from an other order plant would not be producer milk under the Central Arizona order. Amendment also provides for cream transferred outside the marketing area and outside Imperial County, California, to be classified as Class III if labeled "cream for manufacturing use only".

The <u>Class I differential</u> is increased from \$2.30 (plus 20 cents) to \$2.32 (plus 20 cents). Amendment lowers the location adjustment on Calss I milk at plants located in Pima County, Arizona, from a plus 30 cents to a plus 12 cents per hundredweight.

Chattanooga - December 1 (34 FR 17619, 10/31/69). A cooperative association or a handler may divert to nonpool plants, up to 35 percent of a producer's milk during each of the month of September through November, provided that not less than 4 days' production of such producer is received at a pool plant during each of these months. Action also permits diversions to, and the receiving of diverted milk from, any other order plant for manufacturing purposes.

Amendment increases the <u>Class I differential</u> from \$1.75 (plus 20 cents) to \$1.95 (plus 20 cents). Amendment also deletes the supply-demand adjustment to the Class I price from the order.

For plants located north of either the southern boundary of the State of Tennessee or the northern boundary of the State of South Carolina and more than 65 miles from Chattanooga, the Class I price is reduced 15 cents and an additional 1.5 cents for each 10 miles or fraction thereof over 75 miles.

Georgia - December 1 (34 FR 17618, 10/31/69). This amendment expands the marketing area to include the Georgia counties of Floyd, Gilmer, Gordon, Pickens, and Union.

#### New Order:

Oregon-Washington - December 1 (34 FR 18897, 11/27/69). (Pricing provisions are effective January 1, 1970). The Oregon-Washington marketing area consists of the Oregon counties of Benton, Clackamas, Clatsop, Columbia, Coos, Deschutes, Douglas, Gilliam, Hood River, Jackson, Jefferson, Josephine, Klamath, Lane, Lincoln, Linn, Marion, Morrow, Multnomah, Polk, Sherman, Tillamook, Umatilla, Wasco, Washington, and Yamhill; and the Washington counties of Benton, Clark, Cowlitz, Franklin, Klickitat, Lewis (the town of Vader only), Pacific (all territory south of T. 11N. and Long Island and the North Beach Peninsula only), Skamania, Wahkiakum, Walla Walla, and Yakima. Population (1960 Census) 2,106,821.

New Order: -Con.

The order defines a <u>handler</u> as the operator of a pool plant, a partially regulated distributing plant, or an other order plant; a producer-handler or a cooperative association. A <u>producer-handler</u> is defined as any person who operates, as his personal enterprise and at his personal risk, a dairy farm and a distributing plant, and who receives no milk from other dairy farmers or from sources other than pool plants. Receipts from pool plants of packaged fluid milk products, other than whole milk, are limited to an average of 100 pounds per day during the month.

A distributing plant must dispose of at least 30 percent of its total receipts of Grade A milk (except packaged fluid milk products from other pool plants and other order plants, filled milk, and receipts of diverted milk from other pool plants and other order plants). At least 15 percent of such receipts must be disposed of on routes in the marketing area. A supply plant must ship at least 30 percent of its Grade A receipts (except filled milk) to pool distributing plants during the month. If this requirement is met in each of the months of August through February, the plant has automatic pool plant qualification for each of the months of March through July. Definition of a nonpool plant includes an other order plant, a producer-handler plant, a partially regulated distributing plant, an unregulated supply plant, and an exempt plant.

During the months of March through July, a cooperative association or a handler may divert the milk of any producer whose milk has been received previously at a pool plant. During the month of August through February, a cooperative association or a handler may divert on other days the milk of any producer from whom at least three deliveries are received at a pool plant during the month, except that the aggregate quantity diverted may not exceed the aggregate quantity received during the month from all producers. Order provides for the Class I price for the current month to be announced on or before the 5th day of each month. The uniform price to be announced on or before the 14th day of each month.

Class I milk is all skim milk and butterfat disposed of in the form of a fluid milk product, in end-of-month inventory of packaged fluid milk products, and not accounted for as Class II or Class III milk. Class II milk is all skim milk and butterfat disposed of in the form of sweet and sour cream, sterilized or aerated cream, and milk and cream mixtures containing at least 18 percent butterfat. All skim milk and butterfat used to produce cottage cheese, frozen or plastic cream, ice cream, ice cream mix, frozen deserts, frozen deserts mixes, sour cream dips, eggnog, yogurt, aerated cream products, and condensed milk or skim milk disposed of in bulk to commercial food processors. Class III milk is all skim milk and butterfat: Used to produce any product other than a fluid milk product or a Class II product; in products which contain 6 percent or more of nonmilk or oil; in dumped fluid milk products; represented by the nonfat solids added to a fluid milk product which is in excess of an equivalent volume of such product prior to the addition; in end-of-month inventory of bulk fluid milk products; and, in shrinkage.
